

WE ARE READY TO HELP YOU UPGRADE TO NEW TECHNOLOGIES

To be productive, your employees need a consistent work experience on whatever type of device they choose --- PCs, tablets, laptops, convertibles or smart phones.

Bring together the familiar Office apps with cloud services like email, file sharing, & HD video conferencing.

It's natural to be curious as to which Microsoft Office version is the better solution for your company, and we definitely recommend that you make a decision based on accurate information about how your purchase will support your business today and down the road.

ASK ABOUT OUR SPECIAL SELECTION OF WINDOWS 8.1 DEVICES & SOFTWARE BUNDLES WE DELIVER AND INSTALL!

ACCESS WHEN YOU NEED IT

Enjoy remote access to all your files and information whether it is stored at your office, on your device or in the cloud.

UPDATES ON-DEMAND

Your systems are monitored 24 hours a day. Security updates pushed to your systems as soon as they are released.

EXPERTS BY YOUR SIDE

Let one of our expert customer care specialists help guide you through the features of today's new business technologies.

The DSS CloudZone solution is a ready-to-go small business computing environment built on the Microsoft Server 2012 operating system.

This on-site appliance taps into the Cloud for additional processing power if needed and transparently integrates with Office 365.

CloudZone servers include all the hardware, software and services required to maintain your computing environment's infrastructure. As an added bonus we do all the maintenance for you.

OUR TECHNOLOGY BLUEPRINT FOR SMALL BUSINESS

With several different options from which to choose, you'll easily be able to find the right solution for your specific business needs, team requirements and more. You'll also find that today's new technologies offer you the ability to do more, in less time, and with less hassle. Reliable and backed by DSS Digital Group's industry-best support and uptime, there's truly never been a better time to upgrade.

Benefit from our 15-years of technology services know how. Below you will find the six steps we use to create a state-of-the-art technology environment for your small business. Visit us today at cloudzonecomputing.com to find out more.

- 01** Evaluate the existing requirements and offer the right solution for your business.
- 02** Procure today's enhanced hardware and software for your business at the right price.
- 03** Install an On-site Server with Off-site backups so your files are accessible and safe.
- 04** Integrate an access anywhere environment to share information with employees, clients and vendors.
- 05** Migrate your existing data into your new environment. This step seems to get overlooked until it is too late.
- 06** Implement a world class help desk with industry experts at your disposal. To provide you with the support you need.
